SKYLINE™

high-intensity play

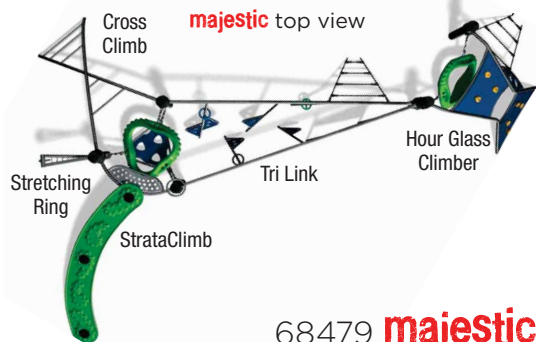

challenging High-intensity play elements allow children ages 5-12 years to experience different play patterns each time they engage on Skyline.

sleek The absence of traditional decks provides unrestricted play access, encouraging ease of movement and excellent supervision qualities.

variety Over 20 different ground-based activities offer increased challenge and difficulty levels that are controlled by the child.

68479 **majestic**
Activities: 5 events
ASTM Use Zone: 28' x 37'1"
Capacity: 20-25 kids
Fall Height: 8'

Heavy-duty galvanized 5" O.D. uprights, factory drilled and easy to install

Pops of color and fun games kids can create

Continuous movement helps develop upper body and core muscle strength

new directions in play!

compact When space requirements are a key consideration, Skyline minimizes the overall playground footprint, while maximizing play value.

Modern aesthetic keeps communities up to date with the most cutting-edge play available. Architectural lines and unique accents attract families to the play space. **No defined entry point** allows multiple options for placing Skyline in your space.

Open site lines permit increased supervision

Attractive rubber toppers and accents conceal hardware

Strategically placed handholds provide secure transitions

4 distinct color palettes designed by play color experts

turf surfacing

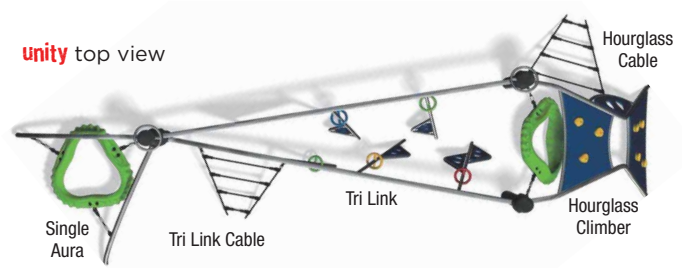

presents a natural, attractive surfacing option for Skyline structures.

with limitless options

climbing that scales

68475 **unity**

The Unity provides a lateral, unrestricted climbing path from one end of the structure to the other, encouraging balance, strength and endurance.

Activities: 5 events

ASTM Use Zone: 21'2" x 34'4"

Capacity: 15-20 kids

Fall Height: 8'

new heights

Children can approach Skyline from multiple entry points and continually renew their engagement as they laterally traverse from one end of the structure to the other.

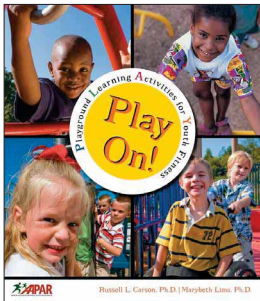

aura stack

The Aura Stack provides a quiet spot for reflection and a break from activities.

Continuous movement through the structure gets children's hearts pumping.

fitness

Maximize physical fitness with **Play On!**® curriculum.

68481 powerhouse

One of our largest structures promotes climbing, balance, overhead, and spinning activities, ideal for schools, parks, or community settings.

Activities: 8 events

ASTM Use Zone: 27'10" x 35'7"

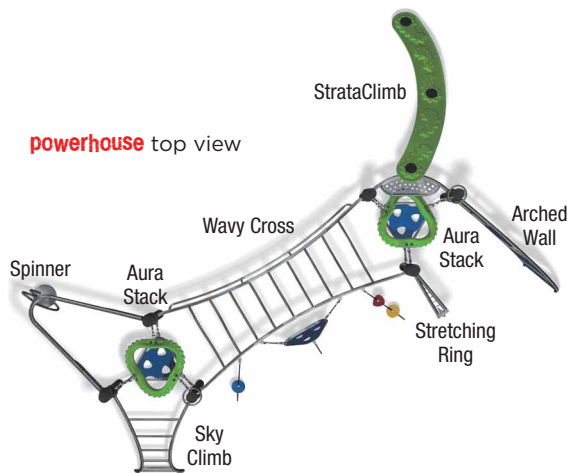

Capacity: 25-30 kids

Fall Height: 8'

linking physical

Skyline presents plenty of opportunities for upper body strengthening, core balance development, and increased stamina.

fitness & fun!

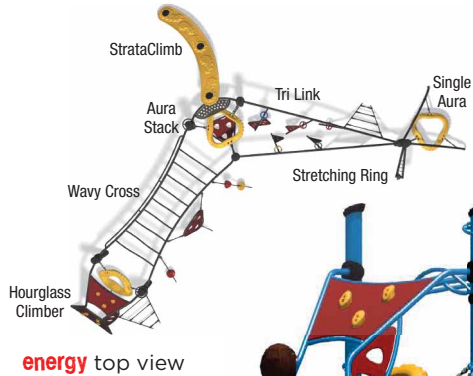

Kids access the structure from undefined entry points.

stretching ring

Kids will improve their upper body strength and stamina as they swing and spin.

linear structures are perfect for **traversing**

double disc cable

Two curved discs offer climbers a challenging foothold while the cable provides just enough movement to test balancing skills.

skyline components

wavy cross Multi-function climber improves balance and brachiating abilities.

tri link The ultimate link spans the length of the structure with colorful accents for game play.

aura stack A fun place to hang out with friends. The Aura Stack also allows children to climb on, through, or around to reach other destinations.

strataclimb

Textured climber helps develop coordination and balance.

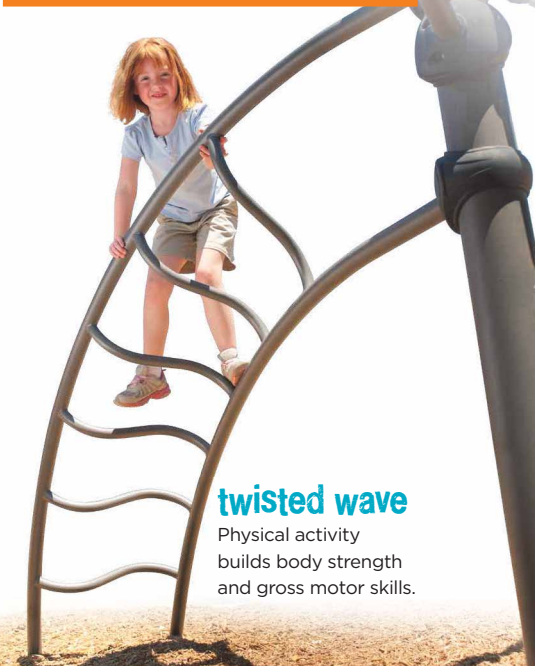

sky climb improves coordination and balance.

arched wall

Alternating openings allow kids to create their own path as they weave their body through to the top.

sky wall Provides climbing challenges on both sides, with professional hand holds and openings for supervision.

twisted wave
Physical activity builds body strength and gross motor skills.
